Title

Author(s) Name(s)

Abstract—**Toggle the LaTeX variable `editmode` in the main source file to show/hide the bullets and labels. If switching the edit mode results in a compilation error, just delete the .aux file.**

If the LaTeX variable `singlenarrowcol` is 1, then each page contains a single column whose size equals the size of each of the columns in a double-column layout. This is convenient for editing and reviewing the document in a laptop screen. The number of pages when `singlenarrowcol` is 1 is roughly twice the number of pages when `singlenarrowcol` is 0.

Index Terms—**One, two, three, four, five**

I. INTRODUCTION

[test citation [1]]

II. MODEL AND PROBLEM FORMULATION

Test equation:

$$e^{j\pi} = -1 \tag{1}$$

III. PROPOSED SOLUTION

IV. NUMERICAL EXPERIMENTS

V. CONCLUSIONS
